

# MINNESOTA APPRENTICESHIP INITIATIVE

**Promoting the time-tested model of registered apprenticeship as a proven strategy to recruit, train and retain a highly skilled 21st century workforce.**

## GOAL

Expand and scale the registered apprenticeship model in Minnesota.

Engage more than 100 Minnesota employers to explore, develop and launch quality registered apprenticeship programs that place 1,000 new apprentices in high-demand, high-growth occupations in the following targeted industries:

**Advanced Manufacturing | Health Care | Transportation | Information Technology | Agriculture**

## HOW IT WORKS

Developing and implementing a registered apprenticeship program can be a strategic investment in your future business and workforce.

Employer participants may be eligible to receive up to \$5,000 for each apprentice to cover initial start-up costs related to supplies, materials, instruction and program infrastructure.

The initiative is a partnership between the Minnesota Department of Employment and Economic Development (DEED) and Apprenticeship Minnesota at the Department of Labor and Industry (DLI), funded through a \$5 million grant by the U.S. Department of Labor.
